115 HOMELESS HOUSEHOLDS

The Logan Zero campaign is an initiative to end homelessness and rough sleeping in the Logan region through a coordinated, collaborative and person-centred approach.

115 households on the Logan By Name List completed a VI-SPDAT* survey between December 2021 and September 2022.

This provides an initial insight into the housing and support needs of the region that will be built on over time.

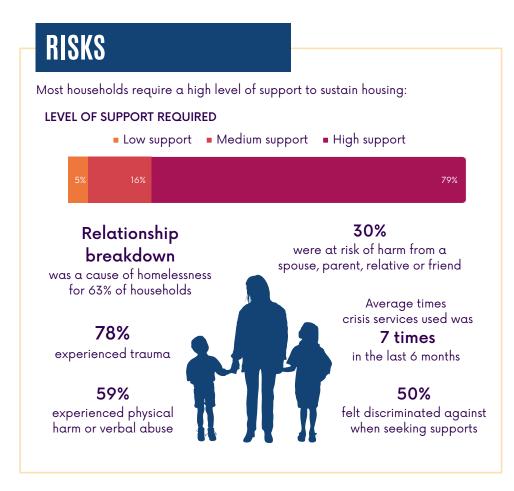

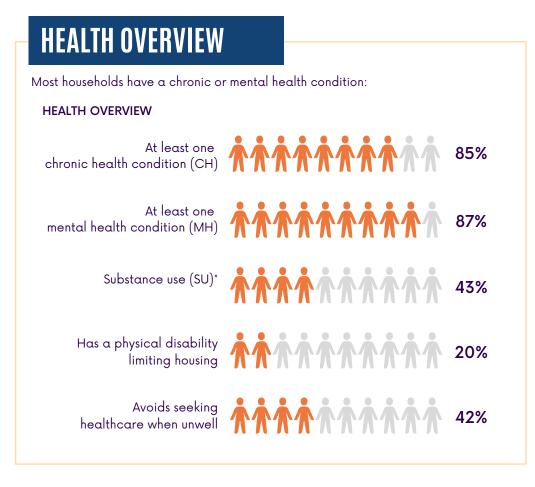

(at or under 18 years old)

Participants voiced that to be safe and well, they wanted to be:
"Getting on top of things, stability for kids, stable job, stable housing, situation is not temporary"

25 Years

PHYSICAL HEALTH CONDITIONS MENTAL HEALTH CONDITIONS MENTAL HEALTH CONDITIONS Asthma Dental problems Foot/skin infections Heart disease Depression Anxiety Post traumatic stress disorder (PTSD) developmental disorder

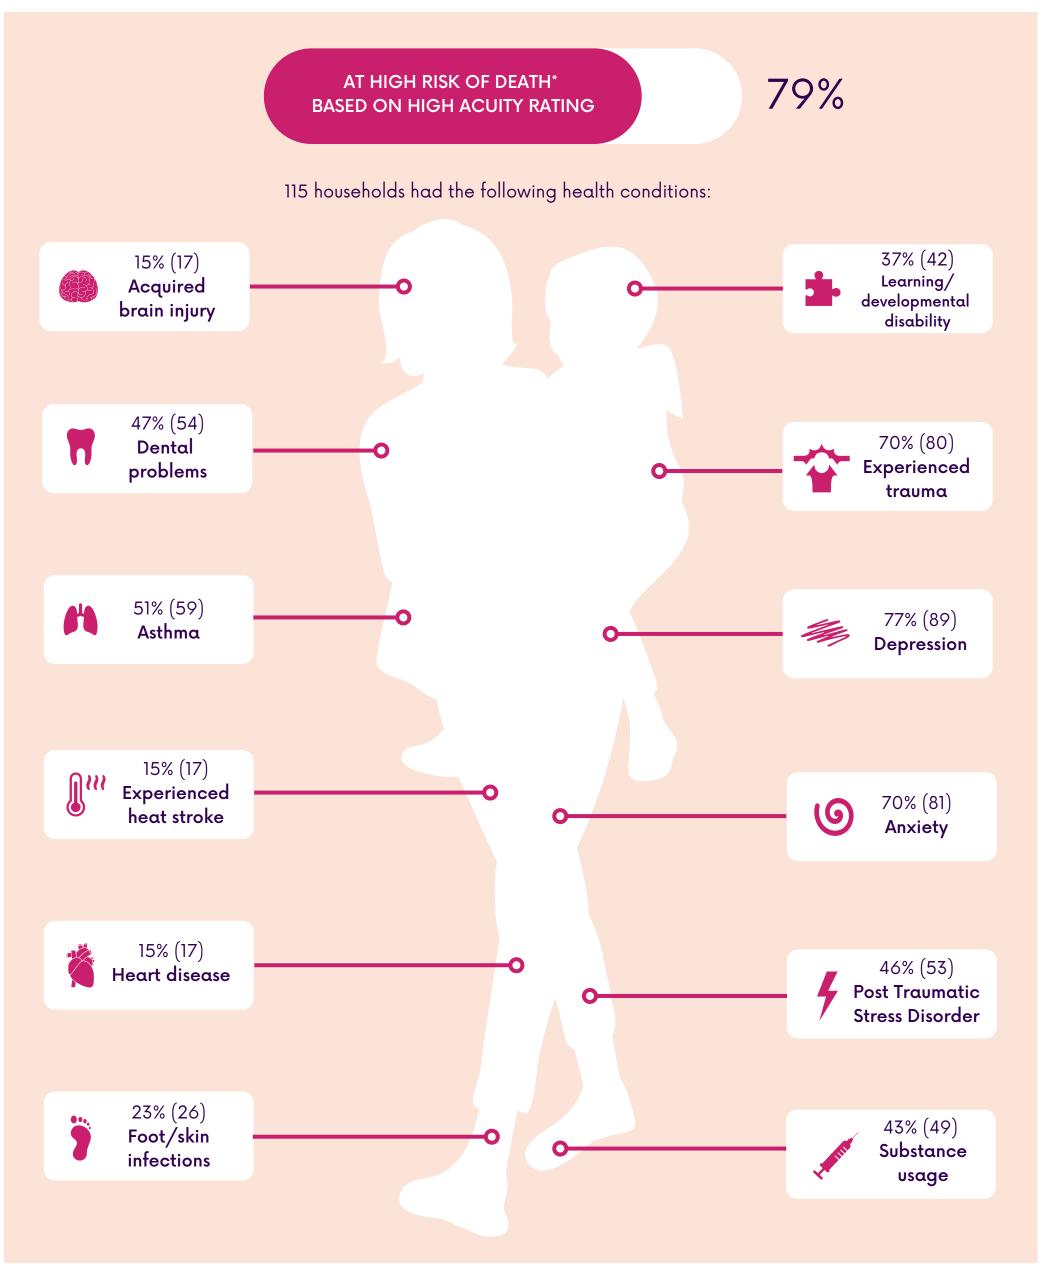

- 1. This data is representative of 115 households where main presenting person per household completed a Vulnerability Index Service Prioritisation Decision Assistance Tool (VI-SPDAT) survey between December 2021 to September 2022.
- 2. VI-SPDAT surveys provide an acuity score to indicate the level of support required to sustain housing as low (score 0-4), medium (score 5-9) and high (score 10+).

 3. Household types: Individual adults (>= 26 years old), Individual youths (16-25 years old), Families are multiple groups of people presenting together regardless if they have dependents.
- 3. Household types: Individual adults (>= 26 years old), Individual youths (16-25 years old), Families are multiple groups of people presenting together regardless if they have depende
 4. Total number of people include main presenting person (head of household), second head of household, and children that were with and not with families at time of survey.
- 5. Figure for 'First experienced homelessness as a child' may be under represented due to non responses to the question by 27 people.
 6. Figure for 'Substance use' is based on answering 'Yes' to at least one alcohol and or drug use question to indicate substance usage.

115 HOMELESS HOUSEHOLDS:

SPOTLIGHT ON HEALTH

- 1. This data is representative of 115 households where main presenting person per household completed a Vulnerability Index Service Prioritisation Decision Assistance Tool (VI-SPDAT) survey between December 2021 to September 2022.

 2. VI-SPDAT surveys provide an acuity score to indicate the level of support required to sustain housing as low (score 0-4), medium (score 5-9) and high (score 10+).

 3. Household types: Individual adults (>= 26 years old), Individual youths (16-25 years old), Families are multiple groups of people presenting together regardless if they have dependents.

 4. Total number of people include main presenting person (head of household), second head of household, and children that were with and not with families at time of survey.

 5. Figure for 'High risk of death' is based on people who scored highly on the VI-SPDAT acuity scoring. People experiencing homelessness have been shown to be at increased risk of mortality. https://www.aihw.gov.au/reports/australias-banth/septendessness. health/health-of-people-experiencing-homelessness
